as follows:

In the Claims:

Please add claims 48-51, as follows:

RECEIVED
FEB 26 2001
Technology Center 2100

--48. A method, comprising:

intercepting, by an operating system probe associated with an operating system function,
an operating system call being issued by a downloadable to an operating system and associated
with the operating system function;

comparing, by a runtime environment monitor, the operating system call against a
predetermined security policy before allowing the operating system to process the operating
system call;
